EXPLANATION

The field of knowledge is divided into nine main classes and these are numbered by the digits, 1 to 9. Cyclopedias, periodicals, etc., so general in character as to belong to *no* one of these classes are marked nought, and form a tenth class. Each class is similarly separated into 9 divisions, general works belonging to *no* division having nought in place of the division number. Divisions are similarly divided into 9 sections and the process is repeated as often as necessary. Thus 512 means Class 5 (Natural Science), Division 1 (Mathematics), Section 2 (Algebra), and every Algebra is numbered 512.

The books on the shelves and the cards in the subject catalog are arranged in simple numerical order, all class numbers being decimals. Since each subject has a definite number, it follows that all books on any subject must stand together. These tables show the order in which subjects follow one another. Thus 512 Algebra precedes 513 Geometry and follows 511 Arithmetic.

Summaries. The first summary shows the ten Classes into which all topics are divided. The second summary shows the nine Divisions of each of the ten classes, and is useful as a bird's-eye view of the whole scheme on a single page. Then follow ten pages, one for each class, showing the nine Sections into which each of the nine divisions of each class are divided. These pages are to be used for a synoptic view on a single page of the scope of each class.

Sub-sections. Following these three summaries is the complete classification, which repeats, in proper order, all the classes, divisions, and sections with all the sub-sections given under each section. Synonymous terms, examples, brief notes, dates, and various catch-words are often added to the simple heads for the convenience of the user, who thus gets a fuller and clearer idea of the field which each number covers. Therefore all references to numbers should be looked up in the **full tables of sub-sections**; never in the Summaries, which are really only a table of contents of the Complete Tables.

Index. After the tables is an index, in which all the heads of the tables are arranged in one simple alphabet, with the class number of each referring to its exact place in the preceding tables. This index includes also, as far as they have been found, all the synonyms or alternative names for the heads, and many other entries that seemed likely to help a reader find readily the subject sought. Though the user knows just where to turn to his subject in the tables, by first consulting the index he may be sent to other allied subjects, where he will find valuable matter which he would otherwise overlook.

Full explanations. Detailed illustrations and rules for the many applications of this system and full explanations of its mnemonic and other important features will be found in the introduction to the full edition from which the "Tables and Index" are reprinted.

.1, Theory, Utility, etc.; .2, Compends; .3, Dictionaries; .4, Essays; .5, Periodicals; .6, Societies; .7, Education, Training, see also 020.7; .8, Polygraphy; .9, History.

011 General Bibliographies. Universal Catalogs.

011 is by **Authors.** If by **Subjects** they go in 016.

012–016 include both bibliographies and catalogs. 017–019 is limited to catalogs of general collections.

012 Of Individual Authors.

Alfabeted by bibliographees, not by compilers; e. g. Chaucer, Dante, Ruskin, etc. Authors whose works are kept together (e. g. in 800s), attract their bibliographies to same number, leaving only a reference here.

013 Of Special Classes of Authors.

e. g. Books written by Jesuits, by Catholics, by members of the Bavarian Academy, etc., or these may go with the church, society, etc., with references here.

014 Of Special Forms. Anonyms, Pseudonyms, etc.

.1, American; .2, English; .3, German, etc.

015 Of Special Countries.

Books published in the country. Publishers' lists, current publications. Subdivided by countries like 940–999; e. g. 015.42, Bibliography of books published in England, as Lowndes or English Catalog.

The history of literature, i. e. belles lettres, poetry, drama, fiction, etc., goes, of course, with those topics in 800; but the literary history of any given place or period covering the writings on all subjects as well as in literature, is bibliography, and goes, usually, in 015, though the literary history of some special class is 013.

016 Of Special Subjects.

Subdivided like the main classification, from 000–999; e. g. 016.01, Bibliography of bibliographies; 016.091, of manuscripts; 016.5, of science; 016.942, of English history, etc.

Library and Sale Catalogs.

Catalogs of any special subject, whether subject, author, or dictionary, go under its subject number, in 016, which is the ruling heading wherever it conflicts with another. 017–019 therefore includes only catalogs of general collections, limited to no one class or subject.

017 Classed Catalogs. Systematic or Logical.

.1, Public; .2, Private; .3, Auction; .4, Booksellers.

For all forms of alphabetical subject catalogs, see 019. See 016 for Bibliographies.

018 Author Catalogs. See 011 for Bibliographies.

.1, Public; .2, Private; .3, Auction; .4, Booksellers.

A volume containing both author and subject catalogs is more useful in 017. For auction catalogs of private libraries use 018.2, not 018.3. 018 includes accession, chronological, and any other forms (except subject and dictionary) of catalogs of collections.

019 Dictionary Catalogs. Alphabetico-classed, etc.

.1, Public; .2, Private; .3, Auction; .4, Booksellers.

.8 Injuries. Defacements. Mutilations. Losses. Thefts.

.9 Other Regulations for Users.

025 Administration. Departments.

025 is for the librarian's part. The trustees build and furnish (022); make rules for government and service (023), and regulations for readers (024); but the administration involves questions of its own, which, however, are closely allied to topics in 021–024 and elsewhere; e. g. the librarian must know his side of binding, and be able to give proper directions and supervision, but need not know all the details of the binder's craft (686).

Administration includes .1, Supervision; .2, Acquisition; .3–6, Utilization; .7–9, Preservation; i. e. the librarian's duty to books is to Get, Use, Keep.

.1 Executive. General supervision.

Finances, accounts, salaries (see 023.8); Supplies, printing; Publications, statistics, reports, bulletins; Relations to readers, permits, privileges, visitors; Correspondence.

.2 Accession. Acquisition.

Selecting and buying books, serials, pamphlets, ephemera; Prices, discounts, duty free, importation (see 337.8); Auctions, old book lists; Sale duplicates, exchanges, gifts (see also 021.9); Reception, checking bills, collation; Plating, pocketing, embossing, private marking; Accessioning; Order slips, index and book, order and serial blanks.

.3 Catalog. For printed catalogs themselves, see 017–019. This is for *cataloging*.

Printed, manuscript, or card; Author, subject, title, classed; Dictionary or combined; Coöperative rules; Size notation; Coöperative cataloging; Duplicated titles, print or photography; Mechanical accessories, cards, cases and fittings, drawers, trays, blocks, checks, guides, labels.

.4 Classification.

For philosophical classification of knowledge, see 112, Methodology. This is for practical classing of books, pamphlets, and notes, rather than theoretical speculation.

On shelves; in catalogs; in dictionary catalogs; Systems of notation, figures, letters, symbols, combined; Importance and advantages; Difficulties; Close *vs.* broad classing; Mnemonic features; Basis of division; Co-ordination of special subjects.

.5 Reference. Reference books. Aids to readers.

See 028 for general discussion of reading and aids. This is limited to library administration.

.6 Loan. See 024.1 and 024.6 for regulations.

Indicators; Charging systems, legers *vs.* cards; Book cards, marks, pockets; Call slips, readers' cards; Notices, reserves; Registers; Inter-library loans; Mechanical accessories, slip cases, trays, tills, stamps, etc.

.7 Binding and repair. See also 686, Bookbinding.

Materials, durability, tight *vs.* spring backs, sewing, color, lettering; Paper covers and temporary binders; Restoring, mending, cleaning, and oiling.

.8 Shelf. See 022.9, Shelving.

Arrangement; Shelf numbers; Shelf and book labels; Fixed and relative locations; Sizes on shelves; Arrangement and preservation of public documents, pamphlets, papers, manuscripts, maps, drawings, and plans, music, broadsides, clippings; Injuries, heat, gas, insects; Stock taking; Shelf lists.

.9 Building. Care, cleaning, safety. Janitor. Police.

See 022 for building and fittings. This is janitor's department.

026 Libraries on special subjects.

Histories, reports, statistics, bulletins, handbooks, circulars, and everything about the library not more required in one of the sections above. Subdivided by adding the class number of subject; e. g. a Medical Library is 026.61; a Chess Library, 026.795; but the Catalog of a Chess Library is 016.795; Blanks, etc., from any library go under subjects in 025, as more used in studying topics; but, if history of individual libraries is specialized, duplicates are also desirable under the library in 026–7, thus making a complete set of its publications.

027 General libraries.

This includes both circulating and reference; i. e. all not limited to special subjects. Subdivided if wished by countries, like 930–999; e. g. 027.744, College libraries in France. Or if wished, group all by geographical location, using 0 in 4th place to indicate no division by *kinds* of libraries; e. g. 027.044, Libraries of France; 027.07471, Libraries of N. Y. City.

A private library is still classed 027.1, after it has been sold or merged in a public library. But a society library changed to a free public should take 027.4 for all publications after the change.

.1 Private and family.

.2 Proprietary, Society, Club and Athenæum.

.2 is limited to libraries that are semi-private, requiring an election for admission, while .3 includes all open to any one on payment of a fee. It is the difference between a club and a hotel. .3 is for libraries run as a business. A mercantile library, even though it has endowments, if open without individual election, goes in .3 as a subsidized public subscription library. Many private subscription libraries go in .2.

.3 Subscription. Circulating. e. g. Mudie's, etc.

.4 Free public. Rate supported. Endowed. See 331.85.

.5 State and government.

.6 For special classes.

Institution, prison, reformatory, asylum, monastic, workmen's, factory, railroad, sailors, lighthouse, itinerating. A workmen's library of books on engineering goes 026.62, not here, as the subject is more useful than the class of readers.

.7 College.

.8 School. Sunday-school. Parish. See also 371.64; 021.3.

.9 Free news-rooms and reading-rooms. See also 331.85.

028 Reading and aids.

See 374.1–2, Self education by private reading and reading circles.

.1 **Methods.**

Tasting, skipping, reviewing, making synopses, abstracts, extracts, and index rerums (see 029), book marking.

.2 **Choice of editions.** Annotations, indexes, paper, type.

.3 **Courses of reading.**

.4 **Fiction. Novel reading.**

.8 **Aids to readers.** Guidance, printed or personal, see also 028.6 and 025.5.

.9 **Character of reading in libraries.**

029 Literary methods and labor-savers.

Much in 025 and 028 belongs equally under 029 in its full meaning, but practical convenience is best served by referring to 025 and 028 instead of repeating the heads.

.1 **Methods.** e. g. Exact reference; standard sizes; use of colors; thought study; intercalation or card system (see 025.3); coöperative methods; records *vs.* memory, etc.

See 653, abbreviations and shorthand; 154.1, mnemonics; 025.4, classification.

.1 is for what one *learns* how to do by an improved *method.*

.2 is for articles which one must make or buy in order to utilize. Where a pamflet covers both appliance and method, class with predominant feature.

.2 **Appliances. Labor-saving tools and devices.** See also 651.

Most literary labor-saving devices go also under 651, Office equipment and methods; and are best kept together there; e. g. all office and study furniture, fittings and supplies, cases, bookholders, reading desks, pigeonholes, files, etc. For pamflet, map, etc., cases, see 025.8; for binders, 025.7.

.3 **Clippings. Scrapbooks or files.** See also Files 651.

.4 **Notebooks, notetaking, abstracting, etc.**

.5 **Indexing. Index rerums. Printed and patent indexes.**

For alfabeting and transliteration see 025.3.

.6 **Authorship. Writing for press. Copy and proof.**

The Divisions 030–070 below are all subdivided; 1, American; 2, English; 3, German; 4, French; 5, Italian; 6, Spanish; 7, Slavic; 8, Scandinavian; 9, Other.

030 General cyclopedias.

040 General collected essays.

050 General periodicals. Magazines.

060 General societies. Transactions.

e. g. Academies of Paris, Berlin, Vienna, etc.

070 General newspapers. Journalism.

In large collections use geographical divisions under 1, American; 2, English, etc., as in 970 and 940–9. Because of large size and very general character, it is better to keep newspapers together here than to class with local history of the place where published. They could not go on shelves with ordinary sized books, and a reference is made as easily to them under 070 as anywhere.

080 Special libraries. Polygraphy.

090 Book rarities.

Books about these topics, and those chiefly valuable because of their rarity, go here. A rare early edition of Shakspere goes in 822.33 with reference from 099. 090 is mostly used for grouping references to books located elsewhere.

091 Manuscripts. Autographs.

Photographs of mss. go with subject rather than here.
For Diplomatics and Palæography, see 417, and under the special language, 421.7, 431.7, etc.

092 Block books.

093 Early printed books. Incunabula.

094 Rare printing.

Aldines, Elzevirs, Caxtons, etc.; Privately printed books; Unique books.

095 Rare binding.

Noted binders, costly ornament, curious bindings.

096 Rare illustrations or materials.

Illuminated. Illustrated by inserted plates. Printed on vellum, silk, bark, etc., in gold or silver letters, etc.

097 Ownership. Book plates. Ex libris.

098 Prohibited. Lost. Imaginary.

Subdivided like 940–999. e. g. 378.42, English universities; 378.741, Maine colleges.

The various colleges of any section may be given each a number or be arranged alphabetically. Under each college arrange publications by the following table, placing these letters *after* the letter (or letter and figure) used to designate the college; e. g. a history of Harvard college would be marked 378.744 — HE, and a second history would be book numbered HE1. The practical convenience of this plan outweighs the objection that it introduces classification into the book numbers.

395 Etiquet.

396 Woman's Position and Treatment.

For Costumes, see 391.2; Biography, 920.7.

If a special library about women is wished, 396 is the best place for it. Suffrage, education, and employment can then be put here, with references from 324.3, 376, 331.4, etc., but it would be unwise to bring everything about women here, e. g. to remove 618, Diseases of Women, from the rest of medicine. Books on woman in general go in 396.

Philology.

400 Philology in General.

In Philology the general works put under 400–419 deal almost entirely with the Indo-European languages. They are put here because they cover most of the divisions of this class, and in practice are most convenient here. Under 439, 479, and 489 are placed books limited to the Teutonic, Romance, or Hellenic groups, and under 491 are placed only such general works as are specifically limited to the Indo-European group.

410 Comparative.

410–419 includes *comparative* works in *general* and also those on the Indo-European group in general, but general *and comparative* works on Teutonic group are 439; on Romance group 479; on Hellenic group 489. Everything about an individual language is put with that language.

.9 **Particles. Adverbs, Prepositions, etc.**

423 Dictionaries. Idioms.

.1, Idioms; .2, English; .3, German, etc. Put a dictionary of two languages with the less known language. Under 423 put only English-English dictionaries. Put an English-French dictionary with French, 443.2; a French-Latin dictionary with Latin, 473.4. If in several languages, put with 413, or with least known. Put French-French dictionaries 443, not 443.4, so the standard home dictionaries shall come first in each language. This plan brings together under each of the less known, all the dictionaries for translating either into or from that language. Some prefer to put each dictionary under the first language; i. e. that by which it is alphabeted. This gives under *each* language, regardless of its familiarity, *all* dictionaries for translating *from* it, but none for translating *into* it. These must be sought under the language from which the translation is to be made. For a cosmopolitan library this plan is simplest and best; but in an English library, the first plan, with only English dictionaries in 423, and both *in* and *out* dictionaries together under little known tongues is more convenient. References in either case show what may be found in the other place.

427 Dialects. Early Forms of Language. Slang.

Subdivided by geographical divisions like 942. The Yorkshire dialect is 427.74; Gloucestershire dialect, 427.41. The dialects of other languages take the geographical subdivisions of their countries. Dialects not provided for in these heads are placed with the last, e. g. American and Scotch with 427.9. The division by time is made with a fifth figure after 0; the earliest form of the language is marked .01; .09 is used for modern slang, e. g. 427.01, Old English.

.9 Geographical.

.91 Distribution of Plants.

.93–.99 is subdivided like 930–999.

This Geographical Classification is to be used only for general works and cross-references. The "Flora of North America" is put 581.97; but "North American Cryptogams" is classed 586 with a reference from 581.97, but No. Am. Phanerogamia goes with 581.97 because it so completely covers the subject.

General Works covering both Phanerogamia and Cryptogamia are put under 580, as books on Vertebrates and Invertebrates are put under 590.

In applying these numbers to Fossil Plants, 561, note that one more figure must be used than in Fossil Animals. The Zoölogy numbers are already given in the third place in Paleontology, e. g. 592 Invertebrates, 562 Fossil Invertebrates, and so on to 599 Mammals, and 569 Fossil Mammals. But in Fossil Plants, 561, all eight sections are grouped together and the section number must be repeated. Fossil Phanerogams are 561.2 not 562, which is assigned to Invertebrate Zoölogy as more important. Lichens are 561.91, etc. In the same way the Fossil Flora of North America is 561.197, i. e., the first two Botany figures, 58, are changed to 561 to give the corresponding Fossil Botany number, while in Zoölogy the only change is from 59 to 56 for first two figures, except in 591, which cannot change to 561, which is assigned to Botany. The Fossil Fauna of North America must therefore go among general works under 560.97.

670 Manufactures.

Specific topics go where of most interest. These heads are for the *general* subject of metal, wood, etc., manufactures, and for such specific manufactures as are not of more interest elsewhere. But an account of a specific manufacture is commonly most useful with its own subject; e. g., a steam engine is certainly made of metal, but its manufacture should go under 621.1, not 672. The character of the library often decides the place of greatest interest. An agricultural library would prefer the manufacture and everything about wood churns with the dairy, 637, while a manufacturing library might prefer it with other wood manufactures in 674. A general library will incline to the special subject, as a more minute classification is thus obtained, and references under 670 answer inquiries for all the library has on the subject of brass or rubber or paper manufactures. Whether groupt by use or material, if sought from the other standpoint, the references show the resources promptly. As a rule the use is the better classification, being more minute and oftener wanted. But if the uses are various the general head is better; e. g., bells are for scores of distinct uses, but their manufacture is a unit; but all churns are for the dairy.

Literature.

The classification of literature is by *language* not country, except that North and South American are separated from other English. Canadian French goes with 840; Australian and Indian English with 820; South American Spanish with 860, etc. Numbers assigned to individual authors include only their *literary* works of that section and complete works which cannot be divided. Books on other subjects go with their proper subjects, unless a "special library" attracts all the authors' works, lives, etc. An author writing in two periods has all his books put in the one where most of them belong.

.1 Early Spanish. –1369.

In 711 the Visigothic kingdom, founded in the 5th cent. was overthrown by Arabs; 711–1492 Arabic Period or Age of Reconquest.

Literature began in first half of 12th cent. Earliest poetry, epic; subjects national, themes war and religion (861.11–12). These were followed by an erudite tendency toward classic tradition neglecting national themes (861.13 and 14) which were however revived toward the close of the period (861.15) by continued victories over Moors under Alfonso 11th, 1312–50, thereafter reaction again toward didactic (861.16). Under Alfonso the wise, 1252–84, a general intellectual awakening, but leading to greater results in prose than in poetry. Through him (1) Provençal (and Galician) and (2) Oriental influences were introduced. In Provençal literature chief attention was given to perfection of poetic form. The Oriental was didactic in content, symbolic in form.

.2 Age of Imitation. 1369–1516.

Henry 2d to Carlos 1st, Charles 5th of Germany. 1479, Union of Castile and Arragon. Under Ferdinand and Isabella all Spain was brought under one scepter. Provençal and didactic tendencies continue; a third element was Italian influence. There were three distinct schools:

1. Provençal, specially influential at court.
2. Italian (Dante) or Allegorical, introduced by Francisco Imperial, a Genoese. (Mena, 861.22.)
3. Didactic. A protest against the Italian school in behalf of national literary traditions. (Ayala, 861.21).

.27 **Romancero del Cid.**

"Romances" popular poetry, peculiar to Spain, and generally anonymous; period of production, from earliest times to 18th cent. Golden Age during reign of Ferdinand and Isabella, a grand reawakening coming with the fall of Granada, 1492.

.29 Minor Poets.

861 .3 Golden Age. 1516–1700.

Rule of House of Austria. Painting culminates in this period: Morales 1509–86; Coello 1515-90; Joanes 1523–79; The Herrera—16th cent.; Ribera 1588–1656; Zurbaran 1598–1662; **Velazquez** 1599–1660; Cano 1601–1667; **Murillo** 1618–1682, etc.

Fierce opposition to the Reformation intensified religious sentiment and produced a school of mystics. The sentiment of nationality became a dream of universal monarchy. The chivalric cult of woman was replaced by an exaggerated conception of female honor, the least suspicion of frailty being visited with death.

Great number of poets. Nothing notable in Epic; Lyric very prominent; at first Italian influences more intensified, Petrarch the model. This movement, begun by Juan Boscan 1500(?)–1543, culminated in Garcilaso (861.31). The protest against this in favor of national traditions is best represented by Castillejo (861.32). Mendoza (861.36) represents a conciliation. A fusion of two schools follows in which the Italian wins the major influence. Thereafter appear two new schools:

1. Classic, opposed to the fusion and represented by Leon (861.33) and the Argensolas (861.34) and
2. Sicillian or Oriental (inspired specially by the Bible) of which Herrera (861.35) is standard bearer. First manifestations of "bad taste" appear; (founder of school, Alonso de Ledesma 1552–1623) represented by Gongora (861.37) which despite opposition (Rioja 861.38) produces rapid decadence. "Bad taste" consisted in artificialities, exaggerations, obscurities, etc.

.32	Castillejo, Cristóbal de	1494–1596.
.33	Leon, Luis Ponce de	1528–1591.

Leon is equally important in prose.

.35	Herrera, Fernando de	1534–1597.

.37	Góngora y Argote, Luis de	1561–1627.
.38	Rioja, Francisco de	1600–1659.
.39	Minor Poets.	

.4 18th century. 1700–1800.

At death of Carlos 2nd (1700) war of succession resulted in firm establishment of House of Bourbon, which, with brief interruptions, has continued to rule. Spanish political importance lost. At opening of century complete decadence, "bad taste" every where dominant. Attempts made to regenerate Spanish letters according to principles of French classicism. Little advance, however, till close of century, despite foundation of academies (Spanish Academy, 1714), and doctrinal reform in French sense, proclaimed by Luzan (1702–54) in "La Poetica," etc. Thereafter a kind of revival. Three schools formed:

1. Classic French. Moratin the elder (861.41); Cadalso (861.42); Yriarte (861.45) and Samaniego (861.44).
2. Antique National, protesting against introduction of French taste. Huerta (861.43).
3. Salamanca School, an attempt to reconcile the first two, avoiding their extravagances and conserving what was good in each. Valdés (861.46); Iglesias (861.47); Cienfuegos (861.48); Moratin the younger (862.42) and Jovellanos (868.42). "Prosaism" production of exaggerated opposition to Gongorism or "bad taste" also characterizes period. Influence of French Encyclopedism also manifest. Development of science checked by religious (Inquisition) and political despotism.

Rich development of fables and apologues in verse. Samaniego (861.44) and Yriarte (861.45). In epic, complete poverty.

861.5 19th century. 1800–

Abdication of Carlos 4th, 1808; Joseph 1st (Bonaparte) 1808–13. Ferdinand 7th restored. Salic law abrogated, opening succession to daughter Isabella. Carlist insurrections (upholding Salic law) quelled. Isabella driven from throne by revolution 1868; 1871–Amadeo (Savoy house), 1873, abdicates and republic is proclaimed; Restoration of monarchy in person of Alfonso 12th in 1875.

Age, till close of Ferdinand's reign, very unfavorable to letters. Under Carlos 4th (1788–1808) despotism re-introduced and revolution followed. Policy of Ferdinand 7th, after restoration (1813–33), retrograde. An interregnum in letters. First real awaking with Espronceda (861.52). Same fluctuations as in previous period. Romantic school introduced by Zorrilla (861.53).

.21 Enzina, Juan del (?)1468–1534.
.22 Vicente, Gil (?)1450–1536.

.3 Golden Age. 1516–1700.

Drama of this period is chief glory of Spanish letters; writers show a phenomenal fecundity (at 70 "Lope" had written 1500 dramas), 30,000 dramas composed by beginning of 18th cent. At opening of period Church tried to check development of profane drama placing nearly all in the "Index." Torres Naharro (works pub. 1517) and Lope de Rueda (d. 1567) form transition from preceding period. Latter, reputed father of national theater. Lope de Vega (862.31) real founder. Drama culminates in Calderon (862.35); thereafter decadence.

.4 18th Century. 1700–1800.

Complete decadence of drama in last years of old monarchy. Revival in 18th cent., following French classic drama. Culminates in Moratin the younger (862.42). Opposition of National School voiced in Huerta (861.43). Discussions provoke abundant productions, fecundity rather than merit characterizing mass of writers, Comella (862.41)-Period of unrest; old ideas cannot be reëstablished, new cannot be naturalized.

History.

900 History in General.

901–909 all have *History in General* as their subject, but it is treated in these various *forms*. A periodical on English History goes with 942, not 905, which is only for periodicals on History in General. A Zero in any class number in any part of the classification shows the subject to be general, not specific.

901 Philosophy, Theories, etc. History of Civilization.

See also 220.93, biblical antiquities; 340.3, legal antiquities; 571, prehistoric archæology; 930, ancient history; 390, special customs. 913 is divided like 930–999. Note that this 3 is not the ancient history 3. Keltic antiquities are 913.36, not 913.6, which is African.

914 Europe.

915 Asia.

916 Africa.

917 North America.

918 South America.

919 Oceanica and Polar Regions.

914–919 is subdivided like 940–999. Whenever these main geographical headings occur they may be subdivided exactly like History. The full list of sub-heads is printed only under 940–999. In assigning numbers to travels, use the history tables, and *insert 1 after the initial 9*, and move the decimal point; e. g. Guide to N. Y. City is 917.471, for N. Y. in history tables is 974.71.

920 Biography.

Including Autobiography, Diaries, Personal Narratives, Eulogies, Biographical Dictionaries, &c. All Biography is here grouped together under the main classes, and subdivided in the same way with the variations indicated below for Philosophy, Theology, and Sociology, i. e., the biography of science is divided like science itself, see 500–599. Lives of chemists are 925.4; of botanists, 925.8; of sailors, 926.56; of actors, 927.92; of the inventor of hard rubber, 926.78, &c. The rule is to give each life the number of the subject it illustrates most, or to the student of which it will be most useful.

Another plan is to scatter biography with the other books, leaving 920–928 blank, or using them only for general works, cross references, &c. This simply omits the first two figures 92, and the life of a botanist is 580 instead of 925.8, and goes with the botanical books.

Lives which will not go under any head without "forcing" are best put in a single alphabet under the three figures 920 for men and 920.7 for women.

General and Collective by Localities.

Including only collected lives too general to go under any subject heading.

923 Of Sociology.

923.1–923.8 may be subdivided for nationality, as in 930–999; e. g., the life of an English king is 923.142; of a Russian czar, 923.147; of a Chinese general, 923.551.

924 Of Philology.

925 „ Science.

926 „ Useful Arts.

927 „ Fine Arts.

928 „ Literature.

See note under 920 about subdividing. It is seldom wise to use more than 4 figures, unless in a large special collection; e. g., in a music library, lives of pianists may be separated as 927.86. Professors known as specialists go with the subject taught rather than with teachers; e. g., a professor of geology 925.5; but if more prominent as an educator than as a geologist he goes in 923.7.

In adding figures for the subdivisions of Literature (as in 810–899) Historians are put with miscellaneous authors as 8, i. e., Gibbon's life is 928.28; 928.31 is life of a German poet, and 928.691 is life of a Portuguese poet.

RELATIV SUBJECT INDEX

HOW TO USE THIS INDEX

Find the subject desired in its alphabetical place in the index. The number after it is its class number and refers to the place where the topic will be found, in numerical order of class numbers, on the shelves or in the subject catalogs. All class numbers are decimals; i. e., 571.34, Bronze remains, comes before 571.4, Iron age, and both of them before 572, Ethnology. Printed labels on the shelves or drawer fronts guide readily to the class number sought.

Under this class number will be found the resources of the library on the subject desired. Other subjects near the one sought may often be consulted with profit; e. g., Communism is the topic wanted and the index refers to 335.4, but 335, Socialism, and even the inclusive division 330, Political economy, also contain much on this subject. The reverse is equally true; the full material on Socialism can only be had by looking at its divisions 335.3, Fourierism, 335.4, Communism, etc. The topics which are thus subdivided are plainly marked in the index by heavy faced type.

Topics accidentally omitted from the index will be found in a supplement at the end.

THIS INDEX CONTAINS

in a single alphabet all the subjects named in the Complete Tables of the Decimal Classification together with their synonyms and such other useful topics as could be found in a selection of the largest dictionary and subject catalogs.

Where nothing is found under any number it shows that the library does not yet possess any book on that topic.

IT DOES NOT INCLUDE

all names of places, minerals, plants, etc., but gives only those used in the full tables and a farther selection of the most common and useful. It is not a biographical dictionary and gives **no names of persons** as biographical headings, but only such as appear in the tables in connection with some subject like Philosophy, Literature, or History.

To avoid swelling the index by frequent repetitions of long lists of sub-divisions under every country, language, etc., five general tables have been prepared; viz. 1, Geographical divisions; 2, Form divisions; 3, Languages; 4, Philological divisions; 5, Literatures. These are placed at the end and referred to from all such topics in the index. Explanations precede each index table.

INDEX TABLES.

Table 1. — Geographical Divisions.

The following subjects may all be divided geographically by adding the geographical numbers: i. e., 4, Europe; 5, Asia; 6, Africa; 7, North America; 8, South America; 9, Oceanica. These can be farther subdivided as minutely as wished, like the history, 940–999, which see for full table; e. g.: 42, England; 73, United States; 944, New South Wales; 7471, New York City, etc.

The geographical numbers are formed by omitting initial 9 from the historical numbers given in tables 930–999, and these figures are simply affixed to the number given in the table below; e. g.: Atlases are numbered in the table below 912; in the historical tables France is numbered 944; omitting initial 9 and affixing the remaining figures, 44, to 912 gives 912.44, Atlases of France; New South Wales is 994.4; omit initial 9 and affix the 944 to 912 and the result is 912.944, Atlases of New South Wales. In the table below, Mints are 332.49; in the historical tables England is 942; adding these together (omitting the 9) gives 332.4942, Mints in England. Colleges are 378; N. Y. State, 974.7; add these together (omitting the 9) and the result is 378.747, Colleges in N. Y. State.

A number of unimportant topics, e. g. minor religious sects, which may be divided geographically, are omitted from this table.

They have been printed in the full tables only where they seemed specially needed.

The following is an alphabetical list of these divisions, and the figures prefixed should be *added* to the number of the subject to be sub-divided; e. g. Disputations on Chemistry in general 540.4; Dictionaries of Mining 622.03.

Table 3. — Languages.

The table below includes all languages mentioned in the classification, except those in 494—499, not yet sub-divided.

Any language in this table may be sub-divided like 420, English.

Any philological topic in the index may be transferred to another language by replacing the initial figures of the language, as found in this table, by those of the second language also found here; e. g., Syntax, English language, in the index is 425.2. In this table, English is 42 and French is 44; replacing the 42 by 44 gives 445.2 French syntax. Hebrew is 492.4, and Hebrew syntax is 492.452.

A third way to sub-divide the language is to prefix the language figures as given in this table to the philological numbers given in Table 4.

All three methods give the same result.

Table 5. — Literatures.

The form divisions of English literature: 1, Poetry; 2, Drama; 3, Fiction; 4, Essays; 5, Oratory; 6, Letters; 7, Satire and Humor; 8, Miscellany; may be used to sub-divide any of the languages in the following tables; and any division of English literature in the index referring to this table may be used in sub-dividing another literature, by replacing the initial figures 82 (denoting English) by the figures of the 2d language as given in this table.

Thus Ballads, English literature in the index are 821.04 and in this table Spanish is 86, therefore 861.04 is Spanish ballads; 891.7 is Russian and 891.7104 is Russian ballads.

While this minute division is possible, it is not expedient in all cases: e. g. Icelandic literature will contain little except in one or two of these divisions and a special arrangement similar to 829 Anglo-Saxon is much more convenient.
